

MODEL 103

All the merits of the class-leading Model 101 – with auto-cut.

The Airbond Model 103 improves on the 101 and 105 splicers. The great performance of those splicers has been enhanced with the fitting of a set of automatic cutters – which are adjustable for optimum performance.

Like the 105, the 103 is an advance on the 101, which is used world-wide by carpet manufacturers and spinners.

Splice format:	Ends together
Applications:	Carpet weaving, carpet tufting, upholstery yarns, fancy yarns
Yarns:	Synthetic C.F., synthetic staple, woollen spun, worsted spun, all fibre blends.
Yarn counts:	Nm 0.7 to 200, 5 to 1500 tex.
Twist:	Any twist direction and level. S twist to Z twist. No modification needed.

Like the 101, the 105 joins a vast range of yarns. It can join high- or low-twist, S-twist or Z-twist on one chamber. Even S-twist to Z-twist, wool to cotton, glass to tyre cord.

The 103 has an adjustable body form like the Model 105. In its base form, it's a tiny splicer, designed to work in confined spaces; but it can be fitted with handles, or with a hanging device to be used in a fixed position, or with a carriage for sliding along a rail. It can be also offer enhanced yarn control – using a side-plate fitted with yarn clamps

So 103s are available in twelve forms – and any one form of 103 can be converted to another in minutes.
